SIM IP — Attorney Relationship Nurture Workflow

****For:** Marketing Associate**
****Owner:** Will Rosellini**
****Updated:** May 2026**

PURPOSE

Initiating attorney relationships is half the job. The other half is making sure those relationships produce referrals 6, 12, 24 months from now. This workflow ensures no attorney contact goes cold, every touchpoint delivers value, and the referral network compounds over time instead of decaying.

The underlying principle: prosecution attorneys don't think about monetization every day. Your job is to be the person they think of the one time a client asks "is there anything we can do with these patents?"

PART 1: RELATIONSHIP TIERS

Not every attorney gets the same cadence. Segment the attorney contact list into three tiers based on engagement level and referral potential.

Tier A — Active Referrers & High-Potential

****Who:**** Attorneys who have referred a portfolio, are in active conversation about a referral, or manage 3+ clients with 50+ patent portfolios.
****Cadence:**** Monthly personal touchpoint from Will + monthly value-add email from associate.
****Target count:**** 10-15 attorneys.

Tier B — Engaged but No Referral Yet

****Who:**** Attorneys who attended a CLE, responded to outreach, took a meeting, or engaged with LinkedIn content — but haven't referred a portfolio.

****Cadence:**** Monthly value-add email from associate + quarterly personal touchpoint from Will.
****Target count:**** 25-40 attorneys.

Tier C — Contacted, No Engagement

****Who:**** Attorneys who received outreach but haven't responded or engaged. Still in the network but dormant.
****Cadence:**** Monthly value-add email only. Re-evaluate after 6 months — upgrade to Tier B if they engage, archive if no response after 6 value-add emails.
****Target count:**** 30-50 attorneys.

Notion Property Addition

Add to the existing SIM IP Pipeline database:

...

New property: Attorney Tier (Select) — A / B / C
 New property: Last Value-Add Sent (Date)
 New property: Referrals Made (Number)
 New property: Attorney Firm (Text)
 New property: Attorney Sectors (Multi-select) — Life Sciences, Semiconductor, IoT, Communications, Software, Consumer Electronics, Other
 ...

Create a filtered view: *****Attorney Nurture***** — filter by Channel = Attorney Referral, grouped by Attorney Tier, sorted by Last Value-Add Sent (oldest first).

PART 2: THE MONTHLY VALUE-ADD EMAIL

This is the backbone of the nurture system. One email per month to the entire attorney network (all tiers). It should take 15 minutes to read and make the attorney smarter about IP monetization without asking for anything.

Format

...

From: Will Rosellini (wrosellini@simip.io)
 Subject: [Month] IP Monetization Briefing — [Lead Topic]
 ...

****Structure (target 400-500 words):****

****1. Lead Insight (150 words)****

One specific, timely development that affects patent owners. Not a SIM IP press release — a genuine market insight. Examples:

- A notable UPC decision and what it means for enforcement strategy
- A shift in USPTO policy affecting patent quality or prosecution
- A licensing deal that reveals market pricing (anonymized if needed)
- A new technology sector where patent filings are accelerating
- Legislative or regulatory change affecting IP owners

****2. What This Means for Your Clients (100 words)****

Translate the insight into practical implications for the attorney's clients. "If your clients have patents in [area], this [ruling/trend/data point] suggests [specific implication]." Make the attorney look smart if they forward this to a client.

****3. By the Numbers (50 words)****

One data point or stat that sticks. Garden Intel data, UPC statistics, licensing market figures, or portfolio evaluation trends. Something quotable.

****4. From Our Desk (100 words)****

Brief SIM IP update — but only if it's genuinely interesting. A new portfolio acquisition, a notable evaluation finding, or a market observation. Never more than 2-3 sentences. If nothing is newsworthy, skip this section entirely.

****5. CTA (Soft, Rotating)****

Rotate between these — never the same CTA two months in a row:

- "If any of your clients have dormant portfolios in [sector from lead insight], we can run a complimentary 72-hour evaluation."
- "We're hosting a virtual roundtable on [topic] next month. Reply if you'd like an invitation."
- "I'll be at [conference]. Let me know if you're attending — happy to grab coffee."
- "Our latest Substack essay goes deeper on this topic: [link]"
- "We recently completed an evaluation in [adjacent sector] that revealed surprising licensing potential. Happy to share the framework."

Sample Email

...

Subject: May IP Monetization Briefing — UPC Preliminary Injunctions Hitting 68% Grant Rate

[First Name],

The UPC released its updated enforcement statistics last week, and one number jumped out: preliminary injunction requests are being granted at a 68% rate. For context, the comparable rate in U.S. district courts hovers around 35-40%.

What's driving this: UPC judges are applying a "balance of convenience" test that weighs the patent owner's right to exclude more heavily than most U.S. courts do post-eBay. And they're doing it in 14 months, not 3-5 years.

WHAT THIS MEANS FOR YOUR CLIENTS

If your clients hold European counterparts to their U.S. patents — and most prosecution portfolios filed through PCT do — those assets just became significantly more valuable. A European enforcement path is no longer a theoretical backup. It's the primary strategy for an increasing number of patent owners.

Companies that previously dismissed European patents as "defensive only" should be re-evaluating. The UPC has changed the math.

BY THE NUMBERS

Garden Intel evaluated 23 portfolios with European counterparts last quarter. Average estimated licensing uplift from adding UPC enforcement to the strategy: 40-60% over U.S.-only approaches.

FROM OUR DESK

SIM IP acquired the Capricode SyncShield portfolio last month — 50+ OTA device management patents with European validation. First UPC assertion expected in Q3.

If any of your clients hold European counterparts that aren't part of an active licensing program, we can run a complimentary 72-hour evaluation focused specifically on UPC enforcement potential. Just reply to this email.

Best,
Will

PART 3: TIER-SPECIFIC TOUCHPOINTS

Tier A — Monthly Personal Touchpoint from Will

In addition to the value-add email, Will personally reaches out to each Tier A attorney once per month. The associate's job is to prepare and schedule these.

****Format options (rotate monthly):****

1. ****Quick call or voice note**** — 5 minutes. "Saw [development]. Thought of your client [X]. Worth a conversation?" The associate schedules the call and prepares a 3-bullet briefing.

1. ****Personal LinkedIn message**** — Engage with something the attorney posted. Add a comment, then DM with a specific insight.

1. ****Forward with context**** — Will forwards a relevant article, UPC decision, or Garden Intel data point with a 2-sentence personal note. Not the mass email — something specific to this attorney's practice or clients.

1. ****In-person coffee or lunch**** — If Will is attending a conference where the attorney will be present, the associate books a meeting in advance.

****Associate's prep work per Tier A contact per month:****

- Check their recent LinkedIn activity and publications
- Identify one client-specific insight (patent filing, technology news, sector development)
- Draft the touchpoint message for Will to review and send
- Log in Notion pipeline with date and type of touch
- Time required: 15-20 minutes per contact, ~3-4 hours/month for 10-15 Tier A contacts

Tier B — Quarterly Personal Touchpoint from Will

Same format options as Tier A, but quarterly instead of monthly. The associate calendars these in advance — set recurring quarterly reminders for each Tier B contact.

****Quarterly touchpoint schedule:****

- Q3 2026 (Jul-Sep): First quarterly touch for all Tier B contacts

- Q4 2026 (Oct-Dec): Second touch, ideally tied to a conference encounter

- Q1 2027 (Jan-Mar): Third touch

- Q2 2027 (Apr-Jun): Fourth touch — reassess tier. If no engagement after 4 quarterly touches, downgrade to Tier C or archive.

Tier C — Value-Add Email Only

No personal touchpoints unless they engage with the monthly email (reply, click, forward). If a Tier C attorney responds to a value-add email, immediately upgrade to Tier B and add a personal follow-up from Will within 48 hours.

PART 4: QUARTERLY ATTORNEY ROUNDTABLE

The GTM plan calls for hosting a quarterly IP Monetization Roundtable. This is the highest-value nurture event. Here's the operational playbook:

Format

- Virtual (Zoom), 90 minutes
- 10-15 attendees (mix of Tier A and Tier B attorneys)
- Structured as: 30 min presentation + 30 min discussion + 30 min open Q&A
- Will presents, associate manages logistics

Content Template (Rotate Quarterly)

Quarter	Topic	Why
Q3 2026	UPC Enforcement Update: What the First Two Years of Data Show	Timely, data-driven, positions SIM IP as the knowledge center
Q4 2026	AI-Driven Patent Valuation: Inside Garden Intel's Evaluation Process	Demonstrates the 72-hour capability, makes it tangible

[Q1 2027]"Case Studies: What Happened After the Referral" (anonymized) |Social proof. Shows attorneys what their peers are doing. |
 [Q2 2027]"The State of the IP Monetization Market: H1 2027 Outlook" |Market intelligence. Makes attendees smarter. |

Execution Checklist (Associate)

6 weeks before:

- [] Pick date — check against major IP conference calendar to avoid conflicts
- [] Draft invitation email — personalized, not mass-blast. Mention specific attendees to create FOMO.
- [] Send invitations to all Tier A and selected Tier B attorneys
- [] Set up Zoom with recording enabled (get consent)

3 weeks before:

- [] Follow up on non-responders
- [] Confirm Will's presentation deck is drafted
- [] Prepare attendee list with firm, sector focus, and any active pipeline notes for Will's reference

1 week before:

- [] Send reminder with agenda
- [] Test Zoom link and recording
- [] Prepare 3 discussion questions to seed the Q&A if conversation stalls

Day of:

- [] Send morning reminder
- [] Manage Zoom (mute, chat, recording)
- [] Take notes on all questions and comments — these are content and pipeline signals

Within 48 hours after:

- [] Send thank-you email with recording link and presentation deck
- [] Send personalized follow-up to anyone who asked a question or raised a specific client situation
- [] Log all attendees in Notion with date, tier update if warranted
- [] Draft LinkedIn post about the roundtable (no attendee names without permission)
- [] Extract 2-3 insights from the discussion for the next monthly value-add email

PART 5: STALE CONTACT RECOVERY

The 14-day stale rule from the Cowork instructions catches deals that go cold. But attorney relationships need a separate recovery process because the timeline is longer — an attorney might not have a referral-ready client for months.

Monthly Stale Audit (First Monday of Each Month)

The associate runs the Notion "Attorney Nurture" view sorted by Last Value-Add Sent (oldest first) and Last Touch (oldest first).

Flag contacts where:

- Tier A: No personal touchpoint in 45+ days
- Tier B: No personal touchpoint in 120+ days
- Tier C: No engagement after 6 consecutive value-add emails
- Any tier: Email bounce (update contact info or remove)

Recovery actions:

- Tier A stale → Will calls within 48 hours. No email — voice only. "Haven't connected in a while. Anything new on the portfolio side?"

- Tier B stale → Associate sends a re-engagement email: "We recently evaluated a portfolio in [attorney's sector]. The results were interesting — happy to share if useful." If no response in 14 days, downgrade to Tier C.
- Tier C stale (6+ months no engagement) → Archive. Remove from monthly email. Don't delete — they may resurface.

PART 6: CONTENT PIPELINE FROM ATTORNEY INTERACTIONS

Every attorney conversation is a content signal. The associate should be extracting themes:

****After every attorney call, meeting, or roundtable, log:****

- What questions did the attorney ask?
- What objections or concerns did they raise about monetization?
- What sectors or technologies are they seeing activity in?
- Did they mention any client situations (anonymized) that could become case studies?

****Feed these into the content machine:****

- Common questions → LinkedIn posts ("Every patent attorney asks me this...")
- Objections → Substack essays addressing the concern head-on
- Sector signals → Garden Intel evaluation targets
- Client situations → ABM target identification

PART 7: ANNUAL RHYTHM

Month	Nurture Activity
----- -----	-----
January	Annual "Year in Review" email — SIM IP highlights, market stats, outlook. Tier reassessment.
February	Value-add email. Tier A personal touches.
March	Value-add email. Q1 Roundtable. Tier A + B personal touches.
April	Value-add email. Tier A personal touches.
May	Value-add email. Tier A personal touches. Conference prep outreach for fall events.
June	Value-add email. Q2 Roundtable. Tier A + B personal touches. Mid-year tier reassessment.
July	Value-add email. Tier A personal touches.
August	Value-add email. Tier A personal touches. Conference meeting requests for Oct/Nov events.
September	Value-add email. Q3 Roundtable. Tier A + B personal touches.
October	Value-add email. AIPLA + LES conference follow-up blitz. Tier A personal touches.
November	Value-add email. Post-conference relationship upgrades. Tier A personal touches.
December	Holiday note (brief, personal, no ask). Tier reassessment. Plan next year's roundtable topics.

PART 8: NOTION AUTOMATION SUMMARY

Set up these Notion automations or manual checks:

Trigger	Action
----- -----	-----
Last Value-Add Sent > 35 days for any contact	Flag for inclusion in next monthly email
Tier A + Last Touch > 45 days	Slack notification: "Tier A attorney [name] is stale — schedule Will touchpoint"
Tier B + Last Touch > 120 days	Slack notification: "Tier B attorney [name] needs quarterly touch"
Tier C + 6 consecutive emails with no engagement	Flag for archive review

|Any attorney replies to value-add email

|Slack notification + auto-upgrade consideration

|Referrals Made changes from 0 → 1

|Auto-upgrade to Tier A if not already

End of workflow. Integrate the monthly value-add email into the Thursday content prep cadence. The associate drafts, Will reviews and sends under his name.

Best,
Will Rosellini
